KATHRYN A. CRAWFORD

McCardell Bicentennial Hall, Room 313 | 276 Bicentennial Way | Middlebury, VT 05753
kcrawford@middlebury.edu | Office: (802) 443-3074 | www.kathrynacrawford.com

EDUCATION

2018	Boston University School of Public Health	*Doctor of Philosophy*, Environmental Health
2007	University of Vermont	*Master of Science*, Natural Resources
2005	University of Vermont	*Bachelor of Science*, Environmental Science, Summa Cum Laude

RELEVANT APPOINTMENTS

2020 –	Middlebury College	*Assistant Professor*, Environmental Studies Program
2018 – 2020	Geisel School of Medicine at Dartmouth	*Postdoctoral Research Associate*, Department of Epidemiology
2011 – 2012	State of Vermont	*Epidemiologic Assistant*, Department of Environmental Health
2008 – 2011	Leggette, Brashears & Graham, Inc.	*Environmental Scientist*
2005 – 2007	University of Vermont	*Research Assistant*, Rubenstein Ecosystem Science Laboratory

Valmyr, M.B.,* Sherley, S.,* Claus Henn, B., Thomas, V., Bradley, D.* **Crawford, K.A.** A qualitative analysis of assessing risk perception, practices, and beliefs toward per- and polyfluoroalkyl substances and other environmental exposures through ski and snowboard preparation. *In Preparation; Target Journal: Environmental Health*

Romano, M.E., Gallagher, L.G., **Crawford, K.A.**, Yim, G., Levy, J., Howe, C.G., Karagas, M.R. Effects of per- and polyfluoroalkyl substances on placental features in the New Hampshire Birth Cohort Study. *In Preparation; Target Journal: Journal of Exposure Science and Environmental Epidemiology*

RESEARCH SUPPORT

2026 - 2030 NSF EPSCoR E-RISE 2546715 (Overall PI: Schroeder; Middlebury PI: Ryan; Co-PIs: **Crawford**, Byrne, Moody, Stratton)
The Vermont PFAS Environmental Research Network (PERN)
Middlebury Award: $2.1 million
Overall Award: $7.9 million

2025 NIEHS R01 (Multiple PIs: **Crawford** and Claus Henn)
Consumer product exposure to PFAS and non-PFAS alternatives: associations with endocrine and cardiometabolic health
Submitted, but application not funded

2024 –2025 NIGMS Centers for Biomedical Excellence (COBRE) Pilot Funds (PI: **Crawford**; Co-PIs: Romano, Kraft, and Taylor)
Fish consumption as a source of omega-3 fatty acids and PFAS in the New Hampshire Birth Cohort Study
Award: $85,000

2023 – 2025 NIEHS Human Health Exposure Analysis Resource (HHEAR) 2022-01431
(PI: **Crawford**; Co-PI: Romano)
Assessment of childhood exposure to organophosphate esters (OPEs), phthalates, pesticides, and polycyclic aromatic hydrocarbons (PAHs) via handwipes
Award: value of the cost of analytical chemistry (estimate: >$500,000)

2023 – 2025 NOAA Lake Champlain Sea Grant (PI: Chen; Co-PIs: **Crawford**, Taylor, Holson, Fernando)
Prevalence and profiles of PFAS in fish and biosentinels from the tributaries and basins of Lake Champlain
Award: $150,000

2023 – 2024 Boston University School of Public Health Pilot Funds (PI: Claus Henn; Co-PI: **Crawford**)
Exposure to per- and polyfluoroalkyl substances (PFAS) and health outcomes among a high exposure-risk population
Award: $20,000

2022 – 2025 USGS 2022NH007PFAS (PI: Chen; Co-PIs: **Crawford**, Taylor, Holson, Fernando)
Uptake and bioaccumulation of PFAS and precursor compounds in lake food webs
Award: $500,000

2020 – 2023 NIEHS R21ES032187-01 (PIs: Chen and Romano; Key Personnel: **Crawford**, Buckman)
Per- and polyfluoroalkyl substances (PFAS) in marine fish and shellfish: A biomonitoring tool for PFAS remediation and a metric for potential human exposure through seafood consumption
Award: $246,000

2018 – 2020 NIGMS P20-GM104416, Sub-Project ID: 6371 (PI: Romano)
Project 2: Effects of perfluoroalkyl substances on gestational weight gain, breastfeeding and early life growth
Role: Postdoctoral Research Associate

2018 – 2019 NCI 5R25CA134286-10 (PIs: Karagas, Tosteson)
Training Program for Quantitative Population Sciences in Cancer
Role: Postdoctoral Research Associate

2017 – 2018 NIEHS T32ES014562 (PI: McClean)
Environmental Epidemiology in Community Settings
Role: Doctoral Trainee

2014 – 2017 NIEHS P42-ES007381 (PI: Sherr)
Boston University Superfund Research Program
Role: Doctoral Trainee

2012 – 2014 NIEHS T32ES014562 (PI: McClean)
Environmental Epidemiology in Community Settings
Role: Doctoral Trainee

2005 – 2007 NOAA NCCOS
Monitoring and Event Response for Harmful Algal Blooms
Role: Master's Trainee

TEACHING

2020 – **Assistant Professor**; *Middlebury College*
Science of Environmental Systems (ENVS 112); Toxic World (ENVS 118); Justice Health & the Environment (ENVS 225); Environmental Health (ENVS 230); Environmental Studies Community Engaged Practicum (ENVS 401); Data Science Across Disciplines (ENVS 1230); First Year Seminar (FYSE 1104)

2019 – 2020 **Discussion Leader**; *Geisel School of Medicine at Dartmouth*
Patients and Populations: Improving Health and Healthcare

2019 – 2020 **Teaching Fellow and Guest Lecturer**; *Dartmouth College*
Epidemiology II

2019 **Lecturer**; *Women and Infants Hospital of Rhode Island*
Fellows' Workshop in Clinical Research Design

2017 **Co-Instructor**; *Boston University School of Public Health*
Water and Public Health

2016 **Teaching Assistant and Guest Lecturer**; *Boston University School of Public Health*
Introduction to Toxicology; Introduction to Geographic Information Systems

2015 **Field Instructor**; *Boston University School of Public Health*
Water and Public Health

2006 – 2007 **Teaching Assistant and Guest Lecturer**; *University of Vermont*
Marine Biology; Introduction to Environmental Science

MENTORING/ADVISING

2020– **Research Mentor**, *Middlebury College* (number of students)

- Fate and transport of molybdenum and PFAS from ski waxes near ski venues (2)
- Waxing in a post-fluoro world: Using portable X-Ray fluorescence (pXRF) to investigate ski wax chemistries (2)
- Perceptions of PFAS exposure and health risks among skiers and snowboarders (2)
- Communicating risk of PFAS exposure from seafood consumption to marginalized populations and subsistence fishers in New Hampshire (2)
- Risk of lead exposure from ammunition fragments in hunted game meat (2)
- Spatial analysis of PFAS in Vermont municipal drinking water (1)
- Understanding atmospheric partitioning of PFAS in indoor environment (1)
- Quantifying PFAS in dust from ski and snowboard waxing as a proxy for human exposure (4)
- Personal care products as a source of exposure to chemical mixtures: A review of global and cultural use patterns (4)
- Personal care product and agrochemical use patterns among a rural Honduran cohort with high prevalence of thyroid disorders (2)

- Evaluating human health risk from lead in drinking water among Vermont school-aged children (2)
- The commodification of health, a student podcast & zine project (2)

Thesis Advising/Committee Member, *Middlebury College* (thesis semester)

- Seafood for Everyone: Some communities deserve tailored seafood consumption advisories (May 2024)
- Heavy metal pollutant analysis in beach and reef sediments and implications for human health (January 2021)
- U.S Nuclear Testing on Indigenous Lands of the Marshallese and Western Shoshone: An Environmental Justice and GIS Analysis (May 2021)
- Metabolism in the Atlantic killifish (*Fundulus heteroclitus*): A population-level comparison to assess long-term effects of pollution (May 2021)
- Toxic Bodies: Investigating PFOA exposure, breastfeeding initiation, and race (February 2022; informal advisor)
- Metabolism, temperature, and pollution in the Atlantic killifish (*Fundulus heteroclitus*) (May 2022)

Academic Advising, *Middlebury College* (number of students)

- First Year Seminar and academic advisor (16)

2019 – 2021 **Research Mentor**, Presidential Scholars Program, *Dartmouth College* (number of students)

- Comparison of risk assessments used by U.S. States and Canadian Provinces to establish fish consumption advisories (1)
- A review of effects of perinatal exposure to per- and poly-fluoroalkyl substances (PFAS) on maternal and child health (1)

2016 – 2019 **Research Mentor**, *Boston University* (number of students)

- A Meal: the ultimate complex mixture (2)
- Quantifying larval fish growth using novel microscopy video techniques (2)

PROFESSIONAL MEMBERSHIPS

- Society of Environmental Toxicology and Chemistry
- International Society of Environmental Epidemiology
- International Society of Exposure Science
- Society of Risk Analysis
- Vermont Public Health Association
- National Center for Faculty Development and Diversity

PEER REVIEWER

Aquatic Toxicology • Current Environmental Health Reports • Environment International • Environmental Epidemiology • Environmental Health • Environmental Health Perspectives • Environmental Research • Environmental Science & Technology • Environmental Science: Processes and Impacts • Exposure and Health • Integrated Environmental Assessment and Management • Journal of the American Heart Association • Science of the Total Environment

PROFESSIONAL DEVELOPMENT

- Faculty Success Program, *National Center for Faculty Development and Diversity*
- Engaged Listening Project, *Middlebury College Conflict Transformation*
- Grant Writing Workshop, *Vermont Biomedical Research Network*
- Inclusive Practitioners Program, *Middlebury College Office of Institutional Diversity, Equity and Inclusion*
- Teach Global Health Summer Institute, *Allegheny College*
- Various programs and trainings, *Middlebury College Center for Teaching, Learning and Research*
- National Institutes of Health Grant Writing Seminar, *Dartmouth College*
- Alan Alda Center for Communicating Science workshop, *Boston University School of Public Health*

SELECTED POSTERS AND PRESENTATIONS (first author only)

Harnessing existing data to answer environmental health questions (invited talk)
Women in Data Science, Middlebury College, November 2026

PFAS exposure from fluorinated ski and snowboard wax (invited talk)
New Hampshire Department of Environmental Services, Lunch & Learn Series, May 2026

PFAS Exposure: From seafood to ski wax (invited talk)
Vermont State University, Castleton, Vermont, September 2025

PFAS on the Slopes: Uncovering Hidden Risks in Winter Sports (expert panelist)
Wiley Digital Events, virtual webinar, March 2025

Evaluating PFAS Exposure from Fluorinated Waxes Among US Snow Sport Participants

- *Northeast Waste Management Operators Association,* virtual webinar, October 2024 (invited talk)
- *International Society of Environmental Epidemiology Annual Meeting*, Santiago, Chile, August 2024 (poster)
- *Northeast Conference on the Science of PFAS: Public Health and the Environment*, Marlborough, MA, April 2024 (talk)

Fish consumption as a potential source of per- and polyfluoroalkyl substance exposure in the general population of New Hampshire, USA
Great Bay New Hampshire Research Forum with New Hampshire Department of Environmental Services, virtual, January 2024

Making sense of PFAS: A slippery slope (invited talk)
Faculty at Home, Middlebury College, November 2022

What are PFAS? (invited talk)
Middlebury Science Cafe, Middlebury College, October 2022

Evaluating PFAS exposure from fluorinated waxes among U.S. snow sport participants (invited talk)
Vermont PFAS Working Group, Virtual, July 2022

Making sense of PFAS: A slippery slope (invited talk)
Women in Data Science, Middlebury College, May 2022

Evaluating PFAS exposure from fluorinated waxes among U.S. snow sport participants (invited talk)
Northeast Conference on the Science of PFAS: Public Health and the Environment, Marlborough, MA, April 2022

Evaluating PFAS exposure from fluorinated waxes among U.S. snow sport participants

Society of Environmental Toxicology and Chemistry North American Meeting, Portland, OR (virtual), November 2021

Speed might be risky, but not for the obvious reasons
Fall Faculty Forum, Middlebury College, October 2021

Reflecting on COVID-19 through an environmental health lens (invited talk)
Rohatyn Center for Global Affairs, Middlebury College, November 2020

Associations between per- and polyfluoroalkyl substance (PFAS) exposure and breastfeeding duration in the New Hampshire Birth Cohort Study
Gordon Research Conference on Environmental Endocrine Disruptors, Newry, ME, May 2020 (cancelled)

Maternal urinary concentrations of organophosphate flame retardant metabolites: Associations with maternal gestational weight gain, early life anthropometrics, and infant eating behaviors among mother-infant pairs in Rhode Island (poster)
International Society of Environmental Epidemiology, Utrecht, Netherlands, August 2019

Predictors of Breastfeeding Duration in the New Hampshire Birth Cohort Study (poster)
Society of Pediatric and Perinatal Epidemiology Annual Meeting, Minneapolis, MN, June 2019

Predictors of Breastfeeding Duration in the New Hampshire Birth Cohort Study (poster)
Northeast Regional Institutional Development Award (IDeA) Conference, Bretton Woods, NH, August 2019

Healthy Fish, Healthy People: How fish can inform our understanding of effects of metabolism disrupting compounds (MDCs) exposure on wildlife and human health (platform presentation)
Society of Environmental Toxicology and Chemistry North American Meeting, Minneapolis, MN, November 2017

Healthy fish, healthy people: Ecological and human health impacts of early life exposures to endocrine disruptors on metabolic and bone development (poster)
Superfund Research Program Annual Meeting, Philadelphia, PA, November 2017

Healthy fish, healthy people: Ecological and human health impacts of early life exposures to endocrine disruptors on metabolic and bone development (poster)
Society of Environmental Toxicology and Chemistry North American Meeting, Minneapolis, MN, November 2017

Healthy fish, healthy people: Using fish to simultaneously study the ecological and human health impacts of Superfund chemicals in New Bedford Harbor, Massachusetts (poster)
Superfund Research Program Annual Meeting, Durham, NC, December 2016

Healthy Fish, Healthy People? Using fish to simultaneously study the ecological and human health impacts of Superfund chemicals in New Bedford Harbor, Massachusetts (oral presentation)
Gijs van Seventer Environmental Health Seminar, Boston University, Boston, MA, September 2016

Risk assessment and fish consumption advisories: How scientific data inform health policy (oral presentation)
What's in your fish? Forum, Museum of Science, Boston, MA, April 2016
Using Computational Toxicology and Existing Environmental Data Sets to Inform *in vivo* Toxicity Testing (poster)
Superfund Research Program Annual Meeting, San Juan, Puerto Rico, November 2015

Evidence of resistance to AhR-mediated effects of PCB-126 in Atlantic killifish (*Fundulus heteroclitus*), in the Island End River, Chelsea, MA (poster)
The Eighth International PCB Workshop, Woods Hole, MA, October 2014

Evidence of resistance to AhR-mediated effects of PCB-126 in Atlantic killifish (*Fundulus heteroclitus*), in the Island End River, Chelsea, MA (poster)
National Forum on Contaminants in Fish, Alexandria, VA, September 2014

Lower Mystic River Sediment Quality Analysis and Fish Advisory Development (poster)
Boston University School of Public Health MPH Practicum Symposium, Boston, MA, August 2014

Linking Ecotoxicology with Human Health: Industrial Pollutants, Atlantic Killifish and Fish Advisories (oral presentation)
Gijs van Seventer Environmental Health Seminar, Boston University, Boston, MA, April 2014

The Effects of Nutrient Ratios and Forms on the Growth of *Microcystis aeruginosa* and *Anabaena flos-aquae* (oral presentation)
Master's Thesis Defense, University of Vermont, Burlington, VT, December 2007

Water Quality Assessment of Stormwater Entering Lake Champlain from Shelburne Farms, Shelburne, VT (oral presentation)
Shelburne Farms Board of Trustees Meeting, Shelburne, VT, October 2005
